

Flexa is a rubber-like material designed to produce functional prototypes.

The model are flexible, strong, smooth and long lasting.

It has the same appearance of the injected rubber moulding.

MATERIAL	USE	COLOUR	3D PRINTER
FLEXA 692	Prototype of gaskets, handles, functional parts, footwear, wereable devices and for ergonomic test.	Black	XFAB
FLEXA 693	Prototype of handles, functional parts, wereable devices and prototype molds.	Light Yellow	XFAB
FLEXA GM08	Functional prototypes	Clear	DigitalWax Serie
FLEXA GM08B	Functional prototypes	Black	DigitalWax Serie
